Hi Tao,

How are you doing? Happy New Year, my friend! I am grateful we met over 20 years ago. I am glad you picked up my phone call. I tell everyone I picked out Tao before anyone else did. And I was right!

Awase Syed is a CGI consultant resource who reports to me at RBC. This is a very capable man. He can implement AI technologies at the code level. He is also a strong communicator. This is an honest man. He works exceptionally hard. I won't go into details about persecution -- due to unusual circumstances, Awase needs to look for another opportunity outside his current sphere.

If you have something available, please offer it to him. Awase will not disappoint you.

Thanks.

Don
