HI Syed,

Thanks for facilitating a training at Harman on Responsive Web Development with Angular JS session. We had 19 participants to share feedback about the training and the way you had facilitated.

You had been rated at 5.9 on a scale of 1-6 (6 as highest). Few of the subjective feedbacks were mentioned for your reference.

Feedback -Comments
How did the workshop help you?
Under / get grip of MEAN start.
Come to know about various tools using which we can do RAD.
It is very useful.
Learned new technologies, getting resolve real time problems.
Helped in learning how to use Angular JS, Create our own web server and may tool which are being used for debug / strappee.
Learnt concepts about Angular JS.
This workshop has given knowledge on how to develop applications responsive it has given lot of examples to practice.
Workshop helped in gaining stands on experience on Angular JS, I was able to do some small assignments on Angular JS. It really helped.
Gave basic knowledge on Angular JS. Would be better if course concentrates only on JS / Angular JS.
Able to understand the technology better & can implement in the learnings in the project.
It will help for me implementing UI applications this trainer is good, he knows to teach new learners.

To start work on more UI frame work & learn new technology.
I am proved UI skills in Angular JS.
Provides an opportunity to leverage skills and get new thought.
Hands on experience on all the Angular JS concepts.
It helped me to understand the basics to begin working.
What was the best thing about this workshop?
Trainer knowledge, Experience and approachability.
One thing I like is most of the topics were covered.
Getting to know versions ready to use frame works, tools to develop quickly.
The content and material, example provided was awesome trainer has good knowledge on the subject.
Covered most of the topics in on real time.
Practicing the examples of Angular JS with demo and checking of correcting the mistakes made.
Good knowledge of instructor & vast.
Practical examples are given and been practiced the same and the assignments given to evaluate the learning are good.
It's really good.
This workshop was new for me, I am happy I learn new technology & I can apply in my job as well.
Step by step teaching.
Good to do more of assignments - practical experience.
Radical way of training with more practical & examples.
Your suggestions and remarks for improvements?
Need to provide list of S/W so we don't waste time @ start of course.
Could have been divided the course into two sections of 3 days each one

| with basics & another with advanced Angular JS. |
| It might have helped more in we have spent more time on topics. |
| It will be good if more hands on programming or assignment given during training land evaluating the employees Angular JS. |
| Less lengthy, comparison required between different examples. |

Regards,

Venkat

HI Syed,

We are not supposed to share the scan copies of feedback form instead I can share the consolidated feedback with you.

Regards,

Venkat
